1.0 GENERAL

1.1 Any customer owned equipment received for evaluation, repair, and/or calibration is to be considered customer supplied product. **Measures of care will be taken while property is under our control or being used.**

1.2 The control of verification, storage, and maintenance of customer owned equipment is described in QP-0700.

1.2.1 Customer owned equipment is identified, stored, and segregated in a manner preventing confused identity, loss, damage, and deterioration.

1.3 Any customer owned equipment that is lost, damaged, or unsuitable for use is immediately reported to the customer and recorded on the Service Report as described in QP-0700.
